

Wattstopper
DLM WIRELESS 6LoWPAN BORDER ROUTER w/LMPB-100
Part No. LMBR-650

The wireless border router manages the creation and configuration of the IPv6 Mesh wireless network for up to 50 DLM Wireless bridge and 250 total devices, and provides network connectivity via wired Ethernet to a local area network (LAN). LMBR-650 devices connect to the border router or to each other to establish mesh routing paths. The border router is quickly commissioned using LMCS Configuration Software and also provides live information about the health of the mesh network in the form of signal quality, device status, network status, and other real-time network information. Wireless communication uses AES 128-bit encryption.

Features & Benefits

Uses IPV6 Mesh to establish network communication with DLM wireless devices

Provides self forming mesh network for up to 50 DLM Wireless bridges and 250 total devices

Supports BACnet integration, scheduling, and demand response

Trusted hardware chips prevent any non-DLM devices from being able to connect to the wireless lighting control network

Dual internal antennas with diversity provide robust signal strength and reliable communication

Single Ethernet port for LAN connectivity and management

Includes out-of-box wireless AES 128-bit encryption

Specifications

General Info

| | | | |
|-------------------|-------------|------------|--------------|
| Product Line | Wattstopper | UPC Number | 754182943203 |
| Country Of Origin | China | Features | Wireless |

Dimensions

| | | | |
|-------------------|--------------|-------------------|---------|
| Product Width US | 6.0 in | Product Weight US | 1.41 lb |
| Product Volume US | 171.17 cu in | Product Depth US | 12.2 in |
| Product Height US | 2.3 in | | |

Additional Information

| | | | |
|-----------------|-----|--|-----|
| RoHS Conformant | Yes | DesignLights Consortium Qualified System | Yes |
| Security | Yes | | |
