Wattstopper
Digital PIR 2-Button Wall Mount Sensor w/Infrared, Ivory
Part No. LMPW-102-I-U

LMPW-100 Series Digital PIR Wall Switch Occupancy Sensors use passive infrared (PIR) technology to detect occupancy for energy-efficient control of lighting and plug loads. They also include one or two switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Management (DLM) system

Features & Benefits

2-button Digital PIR Wall Switch Occupancy Sensor	LMPW-100 Series Digital PIR Wall Switch Occupancy Sensors use passive infrared (PIR) technology to detect occupancy for energy-efficient control of lighting and plug loads. They also include one or two switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Management (DLM) system
Passive infrared sensor with On/Off button(s) to switch selected load(s)	Component of Digital Lighting Management integrated control system
Quick access to Push n' Learn for system personalization	Digital sensor with LCD display and programming pushbuttons
IR transceiver for wireless configuration and remote control	Plug to other components using Cat 5e cables with RJ45 connectors eliminating wiring errors

Specifications

General Info

Product Line	Wattstopper	Color	Ivory
UPC Number	754182934256	Country Of Origin	United States

Technical Information

Sensor Type	Occupancy	Amperage	8 mA
