

Wattstopper DLM Low Voltage 5-Button Shade Wall Switch

Part No. LMSH-SW105X

Legrand's series wall switches are low voltage device for manual control of shades in one or more locations. This device has 1 button and can control any shade motors connected to DLM shade controllers. The switches connect using standard DLM IRB RJ45 cables and have a counter balanced design that allows shades to be pulled into position from the hembar.

Features & Benefits

Available in four different switch configurations to support control of any shade project

Available in six color options: White, Black, Grey, Ivory, Light Almond and Red

Switches are pre-engraved with most common control configurations

Plug n' Go automatic configuration along with Pull n' Save and Push n' Learn for system personalization

Customizable buttons with LED status indicators

Matches DLM Lighting Control switches for consistent design of lighting and shade control

Includes system configuration button for easy system programming from the switch

IR transceiver for wireless configuration and remote control

Components of Digital Lighting Management integrated shade control system

Custom engraving or engraved and non-engraved button kits available
