

The leverage you need for **more efficiency.**

Now you can wire durable straight blade plugs and connectors faster and more easily than ever before. The revolutionary P&S Clamp-Lock system brings you lever-actuated termination that eliminates traditional screw terminals — and provides quick, consistent, dependable connections.

All you need to terminate a conductor is to pull a cam lever to open a Clamp-Lock termination clamp, insert the stripped conductor and close the lever. It's that simple! No tightening terminal screws. Because each of the three levers is identified with the familiar white-black-green color-coding, it's a snap to ensure correct wiring, time after time. The no-exposed-terminal design means finger-safe applications.

These durable plugs and connectors are designed to meet or exceed demanding UL hospital-grade standards, so you can be confident they'll stand up to hard knocks and constant use.

Discover new installation speed and consistency with P&S Clamp-Lock Plugs & Connectors.

Durable connections — faster and easier.

PS515PCLB

Clamp-Lock™ Straight Blade Plugs & Connectors

Self-centering cord grip helps speed assembly.

Removable inserts accommodate the widest possible range of cable diameters.

Rugged nylon housing and backbody withstand chemicals, heat, wear and impact.

Color-coded levers enable terminal identification at a glance and reduce the chance of wiring errors.

Speedy, patented cam-lever termination provides solid, dependable connections.

Molded-in guide shows correct wire stripping length.

U-drive combination slot/crosshead screws ensure easy assembly.

Long, deep channels guide conductors and prevent over-insertion.

Solid brass blades and contacts provide excellent conductivity.

Transparent polycarbonate terminal cover makes terminals visible for visual termination verification.
