

The LMLS-500 is an open loop, multi-zone photosensor that measures the daylight contribution in order to automatically switch or dim up to three zones of lighting. It is part of a Digital Lighting Management (DLM) system and sends light level signals to control loads connected to DLM on/off or dimming room controllers.

Features & Benefits

Digital Lighting Management components plug together on a free-topology Cat 5e DLM local network

Load status verification allows confirmation and testing of controlled load

Compatible with DLM wall switches for manual override, if desired

Mounting options for toplit or sidelit applications

Test mode override of programmed time delay allows easy verification of selected settings

Infrared (IR) transceiver for wireless configuration and control

LED status indicators

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182928927
--------------	-------------	------------	--------------

Country Of Origin	China
-------------------	-------

Dimensions

Product Width US	3.0 in	Product Weight US	0.25 lb
------------------	--------	-------------------	---------

Product Volume US	36.06 cu in	Product Depth US	2.48 in
-------------------	-------------	------------------	---------

Product Height US	4.8 in
-------------------	--------

Additional Information

RoHS Conformant	Yes	DesignLights Consortium Qualified System	Yes
-----------------	-----	------------------------------------------	-----

Security

Yes

Product Environmental Profile

Yes

Technical Information

Sensor Type

Daylight
