WMCT to Ladder Clamp

WMCT to Ladder Clamp
 Now available for Cablofil
 Wire Mesh Tray.

Easy to use WMCT to Ladder Clamp now available from Legrand/Cablofil.

Now it is easy to connect wire mesh cable tray to ladder tray without drilling mounting holes. This unique clamp allows WMCT to be attached to the side rails of any ladder tray and a pre-installed setscrew secures the junction for a permanent installation. The rounded design keeps the cable pathway clear of sharp edges to keep cables safe while being pulled. A supplied black vinyl cap covers the bolt head for complete protection.

To Install WMCT to Ladder Clamp – Use WMC 2LA Clamp wherever WMCT and ladder tray are used in the same cable pathway. Clamp fits most ladder tray styles and for both inward and outward facing flanges.

Install clamp with the WMCT on top of the ladder tray flange. Place clamp in the center of the WMCT and tighten setscrew to secure tray. Install supplied black vinyl cap cover over the bolt head to protect cables.

designed to be better.
