

APPLICATIONS

CPWG Widebody Base with Membrane is designed for economical support of heavy equipment or where weight loading is a factor. Attached gasket allows base to be glued to membrane roofing material. Use for:

- Cable tray pathways
- Gas piping systems
- Electrical conduit
- HVAC Equipment

FEATURES

- Cable pathway or other products mounted to base with clamps and screws
- Adhere membrane to TPO or PVC roofing material to reduce wind lift
- Install on any roofing material or other flat surface
- UV resistant material
- Composite material allows through bolts or lag type screws (through bolts recommended for HVAC equipment)
- Adhere membrane to TPO or PVC roofing material to reduce wind lift
- Widebody design has no maximum load and provides 5 times the surface area on the roof to minimize roof material pressure, increase load capacity and provide over 120 square in/ft for glue application.
