

UP TO **58U****TALL CABINETS**

## More **Space**, Same **Footprint**

Electrorack provides exactly what you need to maximize space in your facility. Whether it's additional height, depth, or width, Electrorack offers built-to-requirements racks, cabinets and accessories that are designed to meet your precise needs. With increases in space utilization of up to 38% over traditional 42U cabinets, many clients are opting to go vertical to maximize the unused space above traditional height cabinets. When making this decision, many factors should be considered including ergonomics, weight load capacity of the rack and floor, heat loads, and logistics. Let Electrorack help determine how to best utilize your space and take your facility to new heights.

## Application Details

### Market

All

### Product Category

Cabinets

### Requirement

Provide a major retailer a means to maximize equipment density in their new data center space. Special attention to transportation and logistics coordination required to ensure proper delivery.

### Solution

Designed a 58U white cabinet to increase space utilization in their facility. Developed special packaging to minimize waste while protecting the product and making sure it fit inside a tractor trailer.
