

GW100 Gateway

The magic of the Player Portfolio's wireless capabilities is thanks to the NuVo Gateway, which connects to a home's router to provide the audio-only wireless network that guarantees reliable, high-fidelity performance.

By plugging in to the home's router, the Gateway is able to wirelessly connect your entire system.

Using the most advanced WiFi protocol, the Gateway allows your system to play audio-lossless content throughout the home, wirelessly, without ever missing a beat. Securing an audio-only network to deliver music and metadata to players and control devices is easy thanks to the NuVo Gateway. For wireless use of the P100 and P200 players.

- The Gateway provides easy setup of an audio-only network, allowing the P100 and P200 players to communicate and share content wirelessly.
- Using the latest wireless protocol, 802.11n, the Gateway delivers faster, more robust signal transmission.
- Concurrent use of both 2.4 and 5 Ghz bands allows the system to avoid interference, for hiccup-free listening.
- Allows players to stream music through every zone in perfect sync, free of buffering.
- Extend the range of the Gateway network by adding a second and third Gateway to the system.
