

Requirements:

1. Fully configured Player Portfolio
 - Setup & functional via Nuvo Player app
2. RTI Control Processor
 - Recommend update to latest f/w version
3. Integration Designer 9.x or APEX
 - Recommend update to latest version

Download Driver: <https://www.legrand.us/nuvo/player-portfolio-third-party-drivers.aspx>

- You will be redirected to the RTI Dealer Site
- Navigate to: Driver Store
- Search by Manufacturer “NuVo”
- Select Nuvo Wireless Audio System
- Unzip to - Documents/Integration Designer/Control Drivers

Configure Integration Designer Project File: Open Integration Designer

1. Select - Global
2. Right-Click>Add New>Drivers> **“NuVo Wireless”**
3. Select the added Driver> Driver Properties
 - Open Nuvo Player App & take note of the zone names
4. Add - Player 1 Name
 - **Must Match the Nuvo Player App Zone Name EXACTLY!**
 - Continue adding zones as needed

By default the system will generate pre-programmed “Music Player” page(s) for each controller.
