

RF Lighting Control System

Sophisticated control made simple.

Imagine the ability to control lights, select complete lighting scenes for any mood or activity and operate ceiling fans and small appliances at the touch of a button from anywhere in a home or on the go. That ultra-convenient, sophisticated control is available with the RF Lighting Control System (RFLC) – a complete selection of dependable, Decorator-style radio-frequency devices. The line also includes matching hard-wired devices. Unlike other whole-house systems, RFLC is effortless to operate and surprisingly affordable.

Wall-mounted or wireless remote Scene Controllers enable users to choose from up to 15 scenes for a room or area – and up to 11 whole-house scenes that create smooth, elegant fades from one scene to another. The Event Controller allows lights to come on automatically or to be controlled using a smartphone or other Web-enabled device.

For security, RFLC offers the option of an occupancy emulator that records the normal use of lights throughout the home. That usage can be played back when homeowners are away, making it appear that the home is occupied.

Discover how easily RFLC delivers exceptional convenience, safety and value.

RF Lighting Control System

Easy to program and operate.

Fast, easy installation via patented screw-pressure-plate back- and side-wiring.

Power-failure memory retains programming through power outages.

System scales to handle virtually any size house – up to 127 rooms and 1,023 devices.

One-touch scene control fades controlled dimmers to preset levels.

Instant full-on and full-off control of all lights in any scene.

Program lights to come on automatically based on time of day or sunrise and sunset.

Mobile control of lighting via smartphone or Web-enabled device.
