

RF Lighting Control System

Offers mobile interface for control of lights while on the go

Simple Web setup of all RF Lighting Loads

LC6001
Event Controller

DRD4-X
In-Wall Forward-Phase Dimmer

Forward-Phase Dimmer operates most dimmable lighting types

DRD6-X
In-Wall Room Scene Controller

Decorator style device mounts in standard one-gang box

Remembers scenes, even through power failures

INNOVATIVE TECHNOLOGY

ONE SYSTEM – WIRELESS CONTROL

The RF Lighting Control System can handle up to 127 rooms and 1,023 devices. RFLC integrates with other home automation devices and systems through the use of RS232 and IR to RF Interfaces and allows for coordinated control of lamps, ceiling fans, and small appliances. The RF Lighting Event Controller provides the capability of controlling any installed RFLC Lighting Control product subsystem via Ethernet or WiFi connected devices.

EFFICIENT INSTALLATION

RFLC requires no special wiring or expensive master controller to work, saving you time and money before and during the installation. No complicated training classes are required – all programming is done at the switch using a simple sequence of button presses.

In-Wall Whole House Scene Controller
DRD5-W V2

SYSTEM FEATURES

- Frequency-agile Radio Frequency (RF) wireless communications technology
- Simple, intuitive programming without the use of a computer or controller
- Increased control with the use of RS232 and IR to RF interfaces
- Plug-in modules allow control of small appliances and table or floor lamps
- Whole-house and room scene control
- Event controller allows for programming custom naming of up to 20 events and 10 scenes
- Homeowners can use smart phone to control lights at home or on the go
