

SHOW YOUR HOME AT ITS BEST
WITH THE RIGHT LIGHTING FOR
EVERY ROOM, EVERY MOOD,
EVERY NEED.

designed to be better.

LIGHTING

BRIGHTEN YOUR WORLD

Simple, effective control

The power to light your home is now (literally) in the palm of your hand. Our lighting control systems use two-way radio-frequency transmission to communicate with one another. Hand-held or in-wall scene controllers make it easy to control all of the lighting in your home.

Set the tone

Bright and cheerful or soft and romantic—you decide how you want your home to feel by choosing how to light it. Whether you control one room or the whole house, lighting options are easy and affordable for every size home.

Light it perfectly every time

Do you like it dim when you watch movies and bright for homework or cooking? Instead of searching for that perfect setting every time, one-touch shortcuts called “scenes” let you set a favorite light level once, then recall it with the touch of a button.

Add security

Never come home to a dark house or rush to switch off lights when you leave. From the safety of your vehicle, you can turn on groups of lights by remote control as you arrive home or turn lights off as you pull out of the driveway.

And comfort

Don't stop at controlling the lights. With Plug-In Lamp and Small Appliance Modules you can wirelessly control your coffee maker, stereo or TV. Fan Speed Controllers allow you to adjust the fan, without standing on a chair to pull the speed chain.

FEATURES & BENEFITS

Transform any room for reading, relaxing or romance
