

Intertek Testing Services ETL SEMKO

VERIFIED
vs.
TESTED

VERIFIED

- Products that bear the **Verification Logo** have gone through a four (4) stage Continuous Program.
 1. Initial testing to industry or customer specifications. Sample selection criteria and sample size are dictated by the specific Program
 2. Manufacturing facility audit.
 3. Final testing to industry or customer specifications. Repeat of Initial testing
 4. Quarterly or semi annual follow up testing as dictated by the specific Program
- Verification Certificate is issued listing part number(s) and/or family of part numbers
- Products are listed in ETL Product Directory
- Products are listed on the ETL Web site under the specific Program
www.etlcable.com
- Banner on the ETL web site indicating product introduction into a specific Program
- Web Link to site for the specific product
- Press releases coordinated with the client

Tested

- Products that bear the **ETL Logo** have been tested to industry or customer specifications. This is a **one time** test where sample selection criteria and sample size are dictated by the product or specification
- Report of Testing is issued listing part number(s) tested

In today's competitive marketplace, ETL Verification provides the ultimate assurance that products meet the standard!
