

7425Y, 7425GRY, 7770, 7770GRY

Weatherproof Covers

Pass & Seymour® weatherproof covers are built tough to endure the harshest weather conditions. The vertical self-closing lift lid prevents contaminants from entering the device. Complete with stainless steel screws, these devices are completely corrosion resistant. Multiple gaskets are provided to ensure a tight seal and easy installation for the end user. The molded label area allows customers to appropriately label the outlet for quick identification.

7425Y

FEATURES & BENEFITS

Vertical Self-Closing Lid |

Rugged build withstands the toughest environments.

Weatherproof design ensures the device will endure the harshest elements.

Corrosion-resistant, stainless steel mounting screws

7425Y

Gaskets provide a tight seal to panel or weatherproof box, sealing out moisture, dust, and debris.

Tamper-proof hinge features permanent, locked-in pins for added security.

Molded-in label area for pre-printed or handwritten labels for identification of circuits, ratings and other application data.
