Built-in, UL-Listed testing monitors ground continuity upstream all the way to the panel. Continuous monitoring of ground continuity and power status, in addition to LED indication information on yellow labels, aids in troubleshooting.

Rated watertight for 1,500 psi high-pressure hosedown, these plugs and connectors feature multiple seals to ensure protection against the environment. Constructed of a sturdy rubber body, which makes them impact- and chemical-resistant, they have nickel-plated blades and contacts for superior corrosion resistance.

And thanks to quick-drive assembly screws and backed-out, ready-to-wire terminal screws, these P&S Watertight GCM Plugs and Connectors offer a fast and easy installation — saving time and money in any application.

Features & Benefits

Dual, bright LED indicators with 360° visibility. Blue LEDs indicate proper ground continuity and power status. Red LEDs indicate ground continuity loss or reversed polarity. No LED indicates open hot, open neutral, or hot to ground cross.

Integral indication of ground continuity and power status. Continuous monitoring enhances personnel safety and adds convenience.

Thermoplastic elastomer body construction stands up to impacts, oils, chemicals, heat, and weather.

Large ribs on body for a superior grip when mating.

Quick-drive assembly screws allow for fast installation, saving time and money.
