At Legrand, we’ve been providing real solutions to real problems for so long, it’s almost second nature. From the world’s first GFCI receptacle in 1971, to the introduction of ground-breaking SafeLock® Protection some 30 years later, we’ve been delivering GFCI innovations designed to enhance safety, shorten installation times, and increase productivity for more than four decades.

Now, we’ve reset the bar on electrical safety again with our newest innovation: the P&S Self-Test GFCI Receptacle.

Designed to exceed UL requirements, it’s the only GFCI that tests itself every three seconds—instead of the industry standard three hours—providing a level of reliable electrical protection that’s unprecedented. The new device is also designed with a thinner profile to make more room for wires in the wall box. That means it’s not only safer, but easier to install as well.

In the same way that Pass & Seymour GFCI Receptacles have been reliably protecting users for almost 40 years, they also protect the environment as well with this product line’s commitment to RoHS-Compliance. RoHS (Restriction of Hazardous Substances) is a directive that requires manufacturers of certain types of electronic and electrical equipment to eliminate hazardous materials used in their products. Legrand is committed to product safety, but also our responsibility as an industry leader.

New external back wire pressure plates with posted terminal screws for faster installation.

Patented SafeLock® Protection: if critical components are damaged and ground fault protection is lost, power to the receptacle is disconnected.

Enhanced tamper-resistant automatic shutter system allows for easier plug insertion while preventing young children from inserting common household objects.

Redesigned side wire cavity improves speed of side wire installation.

New with black “invisi-shutters” for an invisible effect preferred by end users.

Meets latest UL Requirements.

Self-Test GFCI Technology—conducts an automatic test EVERY THREE SECONDS, ensuring it’s always ready to protect.

Captive screws make for easier installation.

Ground terminal clamp allows for fast installation.

Prevents line-load reversal miswire: no power to the face or downstream receptacles if wired incorrectly.

High-impact-resistant, thermoplastic construction for superior strength and durability.

The indicator light flashes if the device fails the self-test, signaling that the GFCI should be replaced.

Auto-ground clip assures a positive ground to metal box.

High-impact-resistant, thermoplastic construction for superior strength and durability.

LEGRAND
KEEPS THE INNOVATIONS COMING

2097TRW
MORE PROTECTION. MORE FUNCTIONALITY.

SAFETY IS OUR CODE
When we invented the first GFCI receptacle, our goal was to keep people safe. Today, because of their proven effectiveness, they are required by code in numerous locations. That’s why we’ve made it our mission to offer intelligently designed solutions for every residential and commercial environment.

Whether the jobs call for receptacles, combination devices, portable, tamper-resistant, weather-resistant, RoHS-compliant, NAFTA-compliant, hospital grade, audible alarm, or specification grade—there’s a reliable P&S GFCI innovation for you.

POWERFUL POINT-OF-USE PROTECTION
Putting GFCI protection within arm’s reach means easier access for homeowners - and fewer callbacks for contractors.

SEE IT, Point-of-use GFCI receptacles are readily accessible and allow homeowners to spot problems quickly. GFCI breakers, however, are hidden in remote service panels in garages, basements, or other inconvenient locations. They can be challenging to access, making it difficult to restore power quickly.

RESET IT: GFCI receptacles have a trip indicator light and test/reset easily with the push of a button. Breakers, however, can be confusing and unfamiliar to homeowners, making it difficult to determine the reason for the loss of power.

PREVENT IT, Without a GFCI device that is accessible and easy to see, trips can easily go unnoticed, leading to much bigger problems. Power loss to sump pumps, freezers, or other important appliances can result in flooded basements or even more expensive property damage.
A SAFETY SOLUTION FOR EVERY HOME

IT ALL COMES DOWN TO KEEPING PEOPLE SAFE.

Our broad Pass & Seymour product line includes all the residential GFCI devices you’d expect from an industry leader—including options from our radiant® collection. In addition to stylish choices, you’ll also find truly innovative solutions you need to meet special requirements, including:

Spec Grade
Tamper-Resistant
Audible Alarm
Combination Switch
Combination Night Light
Weather-Resistant

MAKE NIGHTTIME NAVIGATION AUTOMATIC.
Ideal for kitchens, bathrooms, hallways, stairs, nurseries, and more, this award-winning device, with built-in night light, delivers advanced safety and protection.

TAMPER-RESISTANT GFCI
Helps keep children safe
- Patented shutter system—now with black “invisi-shutters” that disappear for an invisible effect—helps prevent insertion of foreign objects
- Patented SafeLock® Protection—if critical components are damaged and ground fault protection is lost, power to receptacle is disconnected
- Performs a self-test every 3 seconds

TAMPER-RESISTANT NIGHT LIGHT/GFCI COMBINATION
Ensures safety and convenience
- Sealed night light with Lexan® lens prevents tampering
- LED illumination with a 20+ year life expectancy means no bulbs to change
- Photocell turns night light ON in the dark—OFF in the daylight
- Performs a self-test every 3 seconds

AUDIBLE ALARM GFCI
Protection you can see and hear
- Provides an audible warning of a tripped condition and that power to a receptacle is interrupted
- Ideal for basement sump pumps and other areas where a GFCI indicator light might not be readily apparent
- Meets NEC® requirements
- Performs a self-test every 3 seconds

DECORATOR SWITCH/GFCI COMBINATION DEVICES
Ideal for remodeling
- User-preferred up-and-down switching combined with standard GFCI safety features
- Provides more functionality in single-gang opening
- Tamper-Resistant for added safety
- Ideal for bath and kitchen vent fans
- Performs a self-test every 3 seconds

INNOVATIONS THAT TRANSLATE INTO
FASTER COMMERCIAL INSTALLATIONS

SPEED AND RELIABILITY ARE THE KEY TO SUCCESSFUL COMMERCIAL INSTALLATIONS.

Our GFCIs are designed to meet those needs...and then some. That’s because we’ve been offering GFCIs longer than anyone else, so we know what you need to do the job right the first time. Take a look at our innovative line—we think you’ll find a solution that perfectly matches your needs. Every time.

SPECIFICATION GRADE GFCI

■ 20 amp designed for heavy commercial use
■ High-impact-resistant, thermoplastic construction for superior strength and durability
■ The most durable GFCI available. Exceeds UL943 voltage surge requirements; survives 100x the required UL 3kA/6kV voltage surge test cycles
■ Performs a self-test every 3 seconds

PT2097TRW

PORTABLE GFCIs

■ Rugged polycarbonate housing stands up to impacts and hard use
■ Water-resistant design for wet and corrosive indoor/outdoor environments
■ Automatic reset ensures continuous power for pumps, portable signs, lights and engine heaters
■ Watertight rubber cord grommets seal the GFCI from the environment

1594PC2M

NAFTA-COMPLIANT GFCIs

■ GFCIs that meet the requirements of the Buy American provision of the American Recovery and Reinvestment Act
■ Provides the same functionality and protection as our traditional GFCI
■ Performs a self-test every 3 seconds

Spec Grade
Hospital Grade
Tamper-Resistant
Weather-Resistant
NAFTA-Compliant
PlugTail®
Audible Alarm
Isolated Ground
Combinations
Dead Front

PLUGTAIL® GFCI

The fastest-installing GFCI ever. Hands down.
■ Beats tough deadlines on any commercial job
■ No exposed terminals creates a finger-safe application before, during, and after installation
■ Available in Spec Grade, Hospital Grade, Tamper-Resistant, and LED/Night Light combinations
■ Performs a self-test every 3 seconds
■ Enables fast, affordable upgrades as space evolves

PT2097TRW

HOSPITAL GRADE GFCI

■ Meets rigorous requirements of Hospital Grade supplement of UL 498
■ Available in Tamper-Resistant and LED/Night Light combinations
■ Performs a self-test every 3 seconds

PT2097HGTRW

PlugTail’s patented plug and connector design enables simultaneous, one-click terminations.
