

Environmental Policy

Legrand, North America is committed to:

- Setting objectives intended to improve our environmental performance by
 - Incorporating sustainability considerations into our procurement policy and practices.
 - Incorporating eco-design principles into our product development systems.
 - Building efficiency into our manufacturing process by using all possible material, reusing left over material, and recycling when we cannot.
 - Setting and holding ourselves accountable to achieve specific targets to improve performance in energy, water and waste management.
 - Providing transparency into the environmental aspects of our operations, products and supply chain.
 - Engaging our employees to help achieve our environmental objectives.
- Taking action to protect the environment by
 - Preventing pollution at the source wherever and whenever possible.
 - Minimizing our direct and indirect impacts to protect the environment.
 - Advocating public policies that are consistent with our commitment to environmental stewardship.
- Meeting our compliance obligations by
 - Ensuring compliance with relevant environmental laws, regulations, and other requirements.
 - Ensuring safe and proper management of hazardous materials and waste.
- Continuously improving by
 - Evolving our environmental management system.
 - Evaluating opportunities to better serve our customers' needs for sustainable solutions.
