

EQUINOX APP

| EQ-APP

Available in 5, 10, and unlimited licenses

Compatible with all generations of InFusion Controllers with combination SD/microSD card

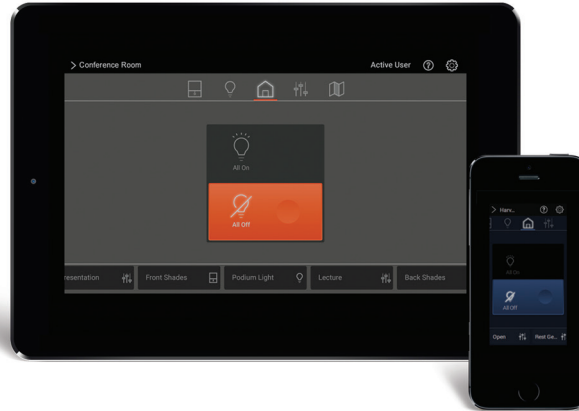

Provides mobile and tablet system access

iOS and Android compatible

Multiple levels of system access using passworded profiles

Five main widgets simplify the control of a space or the entire project – Lighting, Shades, Scenes, Divide and Combine, and Main Screen/Room Button

Easy to use Room Button allows for easy system lighting control from a single button

Description

The Equinox app and accompanying in-wall touchscreens epitomize the ideal user experience by providing a remarkably simple interface for managing commercial environments. With multiple system widgets available and three user levels – admin, manager, and guest – Equinox can dynamically personalize each iPhone, iPad, and iPod or mobile Android device for any profile.

Download

Download the app from the iTunes Store or the Google Play store, install it on the desired tablet, and let the app read the controller system information and build the widgets. Next, configure the different widgets for each tablet and each profile.

Highlights

Legrand brings absolute consistency between your mobile Apple or Android devices and the integrated Equinox world. Whether you're inside or outside of the building, users have constant access and control.

Operation

The Equinox app for mobile devices and tablets follows a simple licensing model. An app licensed on a system through the installation of Equinox 73 or 41 touchscreens and/or purchasing and installing an Equinox app SD license card. Every Equinox 73 and 41 on a project authorizes one mobile or tablet device license without the need of the SD license card. You can purchase an appropriately sized SD license card if you have additional tablet or mobile devices beyond the Equinox 73 or 41 devices on the project. Simply insert the card into the InFusion controller and leave it there. Your additional mobile devices will be ready to go.

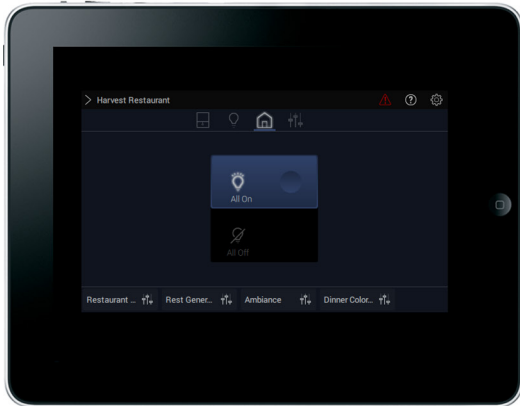

System Requirements

- Wattstopper Architectural Dimming app 1.0 or later
- Apple iOS6 or later; Recommended iOS7 (with 1GB RAM)
- Android OS 2.2 or later with screen resolution 480x320 or greater (Intel x86 ARM processors not supported)
- Wattstopper OS 3.8.x or later
