

DEVICES ARE PRESET FOR PLUG n^\prime GOTM OPERATION, ADJUSTMENT IS OPTIONAL.

Sequence of Operation: The LMLS-400 monitors the ambient light in the controlled space and works with the room controller(s) to maintain the design light level. WattStopper's exclusive control algorithm uses on/off or dimming setpoints and other control parameters to establish the correct light levels throughout the day regardless of changing daylight contribution. For full operational details, adjustments and more features of the product, see the DLM System Installation Guide at www.wattstopper.com

WattStopper® 800-879-8585
