

## **New Toggle Slide Dimmer**

We are excited to announce the new Toggle Slide Dimmer by Legrand. The ergonomic slider was designed with the end user in mind, making it easier to adjust in the dark or on the run. Phase 1 of the launch will include six different dimmers; 700W Incandescent, 1100W Incandescent, 700VA Magnetic Low Voltage, 1100VA Magnetic Low Voltage, CFL/LED and Fan Speed Control. All Phase 1 products will be available for sale on March 22nd.

The new Toggle Slide Dimmer has the following features that should position it as an attractive option in the marketplace.

- The most extensive offering in this category with Tru-Universal, 0-10V and Title 24 SSL7A models available in Phase 2 of the launch on June 28th
- Interchangeable face covers allow for 7 different color options
- Single Pole and 3-Way capability in all models
- A higher wattage rating than the competition
- RoHS and Proposition 65 compliance
- An unmatched Lifetime Warranty

We will be sending sample product and brochures to the field in the coming weeks. The existing Toggle “Mousewheel” Dimmer will be discontinued towards the end of May.

Please share this information with your key distributors and customers.

Thanks,  
Oleg
