

functionality & protection for lab environments

Introducing the new Wiremold® Lab Bench Table Box, an outlet box that is designed specifically for the unique challenges of the lab environment. Laboratory work surfaces often combine the need for ready sources of power for equipment plus the potential for spills.

This combination presents an increased risk for shock or short circuit due to moisture entering the receptacles, or into the outlet boxes that house them. Recognizing that spills are probable in labs, the new Wiremold® Lab Bench Table Box has been designed specifically for lab environments and to perform acceptably when subjected to spills. The field-wired units have also been designed so they can be added to existing benches or designed into new lab construction.

- **Large Capacity** – The new Wiremold® Lab Bench Table Box can be divided into two gangs that each have the capacity to wire a 15A, 20A, GFCI, or a 30A twist lock receptacle. The LBP2 model Table Box is currently the only third party listed table box that can house back-to-back GFCIs.
- **Protection against spills** – The Wiremold® Lab Bench Table Box is the first lab bench activation to be tested to the proposed UL111 standard for multi-outlet assemblies. This standard includes a spill test, which proves there is no risk of shock or short circuiting due to moisture when combined with certain Pass and Seymour receptacles. See the back of this sheet for the complete list of tested devices.
- **Multiple Services** – The Wiremold® Lab Bench Table Box delivers power, communication or A/V with the use of Wiremold AVIP Series Device Plates. The removable divider, allows designers the option to co-locate services in the same outlet box.
- **Variety of Mounting Options** – Field configurability allows installers to attach conduits directly to the box using 3/4" trade size knockouts, or use the 3/4" conduit stubs included with the box.
- **Listed for Work Surfaces** – Meets the NRTL listing for work surfaces as well as UL514A for metallic outlet boxes.
