## Wiremold® Prewired Raceway. Get off the job in one-third the time.

When time's running out. When every hour you save on this job means more jobs down the road. When you simply can't afford to do the wiring yourself. That's when you need Wiremold Prewired Raceway. It's installation tested to install in just one-third the time.

In most cases, wiring raceway yourself is fine – Wiremold/Legrand has been helping electrical contractors do just that for more than 75 years. But when time is an issue, Prewired Raceway gives you the option of letting Wiremold wiring experts do the work for you. Working with you and your plans, the Wiremold team can custom manufacture, pre-cut and pre-wire raceways according to your job site specifications. Wiring is labeled, wrapped and ready for termination at the job site. All you need to do is mount the raceway on the wall and connect the feed wires. Everything goes together the way it's supposed to – every time. You save installation time, labor and money with raceway that's ready for work before it even gets on the job.

Nonmetallic 5400 Twin Snap™ raceway is available pre-wired, and is compatible with modular connectivity inserts for multimedia applications.

Pre-wired, pre-cut components are delivered to the job site ready to install.

## Signed, sealed and delivered – room by room.

This raceway really has its act together. After being manufactured to precise job site lengths, pre-wired and assembled in a controlled environment, each shipment of Prewired Raceway is packaged by room, area or floor with complete sets of documentation and blueprints. It's then clearly labeled and delivered to the job site. When your order arrives, you can quickly get material to the appropriate work area. And you don't have to wait for the entire job to be ready for wiring – you can order Prewired Raceway room by room or area by area, whenever you need it.

Prewired 5400 raceway with Twin Snap™ cover.

## Adapts to any decor.

Just as Prewired Raceway arrives ready for each room, it also arrives ready for any architectural style or decor. Aluminum Prewired Raceway is available in 180 different colors, and nonmetallic and steel can be custom-ordered in almost any color imaginable. Prewired Raceway is ideal for commercial offices, technical labs and college campus applications. And with its low profile and chameleon-like ability to blend into the background, Prewired Raceway gets the job done without calling attention to itself.

## Other Prewired Raceway features.

Available in a wide range of configurations, Prewired Raceway is manufactured to the highest quality standards. Snap fit covers allow receptacles and data jacks to be added and moved quickly and easily, without breaking through walls and fishing wires. A durable, architectural clear anodized finish wipes clean easily and resists corrosion. Other Prewired Raceway features include:

- Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use.
- UL5 and ADA compliant and fully compatible with UTP, STP and fiber optic cabling systems.
- Mitered standard fittings provide a complete installation.
- Accommodates standard electrical wiring devices, including single receptacles, duplex receptacles, NEMA locking receptacles, GFCI receptacles and surge-protected receptacles. Field-replaceable surge protection modules are also available.
- Available in single- and multi-channel models, with single-and multi-cover options to accommodate your wiring and telecommunications needs.

## When and where to use Prewired Raceway.

Ready-to-install Prewired Raceway is ideal for:

- Jobs with plans or deadlines that change mid-project, leaving even less time to complete work.
- Schools and other buildings with very strict, short construction cycles.
- Lab environments or rooms that require durability, quick installation and very predictable, specific wiring needs.
