V4049/G4049 Device Plate
INSTALLATION INSTRUCTIONS

1. Install lower half of the 4049 Device Mounting Bracket onto 4000 Raceway base. Secure upper half of bracket on leg of base and snap in using a flat blade screwdriver (Fig. 1). **NOTE:** If a divider is used, do not install the 4049 Device Mounting Bracket directly over a G4001D Divider Clip.

2. Remove plaster ears from device.

3. Wire device per manufacturer's instructions.

4. Install device onto mounting bracket by screwing into device mounting holes on bracket (Fig 2).

5. Install 4000 Raceway cover. Be sure the cover butts against the mounting bracket, covering the mounting bracket holding tabs (Fig 3).

6. Install trim plate by inserting into snap holes on device mounting bracket (Fig 4).

7. Select appropriate device cover plate and secure tightly (Fig 5).

8. To disassemble, remove the device plates first. Then insert a flat blade screwdriver in the gap between the trim ring and device bracket. Twist the screwdriver (as shown in Fig. 7). To remove the bracket from the raceway base, tightly press in corner and twist a flat blade screwdriver. Do not pry. Repeat all four corners (Fig. 6a, 6b, 6c).
