V2411 90° Flat Elbow
Installation Instructions

1. V2411 Base
   Mount V2411 Base to wall using two No. 10 Pan Head screws.

2. Insert V2400B Base under each tongue of V2411 Base. Mount V2400 Base and Cover per system instruction sheet.

3. Snap V2411 cover over raceway at corner.

NOTE: For ease of installation at corners – Cut-out any receptacle within 4” of corner. This will allow sufficient space within raceway for wire connections where two runs meet. Cut a blank raceway cover piece to fit over any exposed area, if necessary.
