
ALUMINUM CHANNEL-TO-BOX / BLIND END CONNECTOR KIT

CC-4A-CBC/BE, CC-6A-CBC/BE | [Cablofil](#)

FEATURES & BENEFITS

Industry Leading Long Span Aluminum Cable Channel is perfect for smaller runs and cable drops in industrial installations. Long span capabilities allow up to 16' vertical or horizontal spans, minimizing supports and installation costs. Available in ventilated and non-ventilated designs for all industrial applications. Structural sidewall features creates a stronger splice that need fewer supports. Straight splices slides in place and stays without hardware. Additionally, four optional snap pins are needed for each splice, reducing labor by 50%.

- Quickly connect end of channel tray to floors, equipment or electrical panels
- Multiple channel widths to fit a variety of applications
- Can be rotated 90 degrees to use as a blind end
