

PLASTIC DEVICE COVERS

DCP | [Cablofil](#)

FEATURES & BENEFITS

Rough-in is fast and easy with FAS Power. Manufactured floor brackets slide under the sill plate with no vertical measuring needed. Wall brackets with pre-mounted boxes and rings quickly attach to the stud with switches and switch/outlet combinations in place. And for fast job starts, FAS Power products are prepackaged and shipped to the requirements of the contractor.

To save time in the planning process, use our [online configurator](#).

- Plastic Device Covers can be snapped onto empty mud rings to keep them clean, dust free and finish ready during the taping and painting process. The covers are replaced later with faceplates at the trim out phase of construction.

SPECIFICATIONS
