

## MANUFACTURED ASSEMBLIES FOR CONCRETE BLOCK

FB816 | [Cablofil](#)

---

### FEATURES & BENEFITS

Prewired assemblies save time and make electrical rough-ins for concrete block walls easy. Each FB816 is shipped to you pre-wired, fully assembled and ready for rough-in. Each assembly comes with a clear cover to protect pre-wired P&S PlugTail™ connectors during construction and painting.

- **Many choices:** choose from a variety of P&S PlugTail connectors, grounded boxes and empty boxes
- **Adjustable rings:** available with single, double or round adjustable plaster rings
- **Adjusts to fit block thickness:** each plaster ring up to 1 ½" raise
- **EMT compression:** all assemblies are fitted with a EMT compression fitting and an optional 2 foot EMT stub
- **Clear plastic cover:** all assemblies include a clear plastic cover to protect assemblies during construction process
- No additional mounting hardware needed
- ETL Listed

**Installation:** After cutting the proper sized opening in concrete block, place assembly and tighten mounting screws within the concrete block cavity to keep assembly in place during joint mortaring process.
