

FOUR CAMERA NETWORK VIDEO RECORDER

CM7120 | [On-Q](#)

FEATURES & BENEFITS

Safety and home security is always at hand with the unique enclosure-mounted Network Video Recorder (CM7120). It can simultaneously record video, stream live content, or playback recorded video from up to four IP Cameras. Designed for residential use, the NVR is set up and configured by professional installers through the product's web interface. Homeowners can stream cameras live on an HDTV or view remotely on the iOS or Android Camera Viewer app. This solution supports open standards such as OnVif 2.1 and offers a growing list of third party cameras.

- Enclosure-mounted recording solution for up to four IP cameras.
- Convenient on-the-go control and viewing through iOS and Android apps.
- Receive email alerts when motion is detected.
- Conveniently view live camera feed on an HDTV.
- OnVif 2.1 support provides recording capability for third party cameras.
- Four port POE switch supports powering of cameras directly from NVR.
- Free Legrand Dynamic DNS account available for easy remote viewing.
- Requires a 2.5" laptop hard drive up to 4TB in size and PW7760 NVR & PW1458 PoE Power Supplies.

SPECIFICATIONS
