
ADVANCED 5X8 4 LNB MULTISWITCH

364701-01 | [On-Q](#)

FEATURES & BENEFITS

The advanced 5x8 four lnb multi-switch is designed for DIRECTV installations. It allows up to eight satellite receivers to be connected to a Quad LNB Dish (four LNB connections total). This multi-switch has a non-amplified antenna (or cable) input to facilitate combining of terrestrial and satellite information over a single RG6 coaxial cable run. Unique wire management is utilized through integrated lacing bars built into the switch, from which wiring can be secured.

- Cost-effective distribution of the CATV/off-air antenna and DBS signal over one cable
- Quick and easy installation with the patented On-Q mounting system
- High-performance fittings to ensure high-quality connections
- Easily relocate satellite services from room to room
- All modules support DirecTV® digital satellite service
- Ability to support up to 8 satellite receivers
