
M4 2X32 POL SPLITTER, SC/APC CONNECTORS, 1M PIGTAILS

M4S2132SA091M | [Ortronics](#)

FEATURES & BENEFITS

The M4 2x32 POL Splitter is a point to multipoint cassette designed to split 2 SC connector to 32 SC connectors over a Passive Optical LAN (POL) that provides the capability to securely deliver voice, data, and IP/broadband video. A POL is an alternative to a traditional Ethernet LAN and is widely accepted as an ideal replacement of old copper networks. A POL allows you to optimize your resources with a simple, space saving installation and provides benefits such as cost reductions, greater efficiencies, scalability and a clear upgrade path.

- Energy Efficiency: A POL uses unpowered optical components
- Higher Security: A POL supports 128-bit encryption
- Future Proof Infrastructure: Scalable and has a clear upgrade path
- Simple Installation: A POL has a fraction of the equipment used in a traditional LAN
- Cost Reduction: A POL requires less power, cooling, and maintenance
- Single Fiber Two-way Transmission: Reduces cable bulk and increasing airflow in pathways
- Versatile Installation: Splitter cassette loads into front of enclosure tray drawer face or mounting bracket

SPECIFICATIONS

GENERAL INFO

Color: Green

Connection Type: SC/APC

Installation Destination: Infinium Fiber Enclosures

LISTING AGENCIES/THIRD PARTY CERTIFICATIONS

RoHS: Yes

DIMENSIONS

Depth (Metric): 113.03mm

Depth (US): 4.45 in.

Height (Metric): 31.24mm
Height (US): 1.23 in.
Width (Metric): 107.70mm
Width (US): 4.24 in.
Rack Units: 0.7

TECHNICAL INFORMATION

Fiber Capacity: 32
Equipment Type: Splitter
