### FEATURES & BENEFITS

Permanent controlled receptacle marking allows for long-lasting, easy identification of controlled receptacle for end-users. NEMA-approved and compliant with NEC®, CA Title 24, and ASHRAE Energy Efficiency Standard 90.1.

- Can be wired to any number of system-based or stand-alone plug load control solutions.
- Corrosion-resistant, plated and tabbed steel strap locked in to face and back body to resist pulling away from face/body assembly.
- .032 inch thick, brass, triple-wipe power contacts for lasting retention.
- Permanent controlled receptacle markings using abrasion resistant ink.
- Two drive screws anchor strap to back body and face where abrupt removal torque is strongest.
- Tri-drive brass-plated terminal screws. Two back-wire holes for more wiring flexibility.
- Dual mechanical shutter system to help prevent insertion of foreign objects (for Tamper-Resistant models).
- Strap tabs wrap around face to prevent strap from separating from face and back body.
