40928 | [C2G](#)

FEATURES & BENEFITS

When mounting flat screen TVs, it's hard to know what angle will be required for the HDMI connector. Fortunately, our HDMI adapter can be twisted or turned to virtually any position. The rotator adapter features a center ball joint design that enables a 360[D] rotation and bending so that the HDMI cable can easily be run at many angles. The adapter's design ensures signal integrity in any position and its flexibility makes it ideal for HDMI connections in limited spaces. With its 360[D] rotating connector, the days of not having the right connector orientation on your cables are over!
