

2-PORT HD15 VGA WITH PS/2 MANUAL SWITCH BOX

03367 | [C2G](#)

FEATURES & BENEFITS

Switch two VGA monitors and PS/2 keyboards from one central computer. Ideal for presentations, this switch box will house two 15-pin VGA/SVGA and 6-pin mini din connections used with PS/2 keyboards. There's no fear of system lockup because no power is drawn from the keyboard ports. This box has a durable, metal casing which helps prevent signal distortion due to unwanted EMI/RFI interference. An economical and easy solution for all of your presentation switching needs!
