
18FT 10 AWG SONICWAVE®; SPEAKER CABLE

38072 | [C2G](#)

FEATURES & BENEFITS

SonicWave speaker interconnects are the perfect combination of transparent and neutral, high quality audio reproduction and beauty. 10 AWG oxygen-free copper is constructed from 7 bundles of 18 AWG conductors for maximum flexibility. A 12mm PVC jacket provides the protection your cables need for a lifetime of performance. Two interchangeable connector options (5/16in spade terminals and banana plugs) easily attach to the cables and provide configurations for the most common high-end speaker applications.
