
100FT PLENUM-RATED COMPONENT VIDEO CABLE

40797 | [C2G](#)

FEATURES & BENEFITS

Our plenum-rated cable is designed to meet stringent building codes for placement of low voltage wiring within a commercial building. The air space above a suspended ceiling or plenum is a common location for runs of low voltage cables. Placement of low voltage cables within the plenum require the installer to use materials that limit the release of smoke and fumes in the unfortunate event of a fire.
