
SERIAL DATA INTERFACE

LMDI-100 | [Wattstopper](#)

FEATURES & BENEFITS

The LMDI-100 Serial Data Interface connects a Digital Lighting Management (DLM) local network to a third party system for coordinated control of devices including lighting controls, AV equipment, shade controls and user interfaces by either system.

- RS-232 interface connects DLM local network to 3rd party control system
- Facilitates combining DLM with A/V and shade control systems
- Provides access to local network data including occupancy status
- RS-232 communication at 9600, 19200, 38400, 57600 or 115200 baud; default is 19200
- Integral message protocol eliminates the need for interface configuration
- Status LEDs for transmit and receive allow simple verification of connectivity
- RoHS compliant
- Qualifies for ARRA-funded public works projects

SPECIFICATIONS

ADDITIONAL INFORMATION

MODELS

Product Number: LMDI-100-U

GENERAL INFO

Typical Applications: Conference Rooms, Training Centers, Auditoriums, Theaters

Type: Serial Data Interface

Special Features: UL 2043 Plenum Rated

LISTING AGENCIES/THIRD PARTY CERTIFICATIONS

RoHS: Yes

TECHNICAL INFORMATION

Amps: 15mA

Volts: 24VDC
