MULTI-POLE CONTACTOR

C115NC | Wattstopper

The Multi-pole Contactor is a compact, electrically held lighting contactor used for controlling lighting and other electrical loads in Wattstopper Lighting Integrator (LI) lighting control panels.

- Multi-pole design enables control of multiple single-phase or multi-phase loads
- Four pole, SPST power contacts
- Silver cadmium oxide contacts for long life
- Compatible with all HID and electronic ballast loads
- Normally closed or normally open contacts
- Accepts wire gauge #10 - #14 AWG
