
PHASING OUT - LOW VOLTAGE OUTDOOR MOTION SENSOR

EW-205 | [Wattstopper](#)

FEATURES & BENEFITS

Wattstopper's EW outdoor motion sensors provide occupancy based control of outdoor lighting. They provide convenience, security and energy savings by turning on lights only when someone is present. Rain tight and rated for -40°F to 130°F, the EW Outdoor Motion Sensors perform reliably in all weather conditions.

- 24 VDC operation
- Rated for use in temperature range of -40° to 130°F
- Weatherproof and raintight for reliable performance
- Adjustable light level and time delay settings
- 270 or 180 degree field of view
- Works with DM-105-WP for high/low control of outdoor HID lighting

SPECIFICATIONS

ADDITIONAL INFORMATION

MODELS

Product Number: EW-205-24-W, EW-205-24-G

GENERAL INFO

Typical Applications: Walkways, Parking Lots, Dock Lighting, Warehouses

Special Features: UL 773A rated raintight

TECHNICAL INFORMATION

Volts: 24VDC
