FEATURES & BENEFITS

The 880CS1 Omnibox Floor Box Series provides an excellent activation solution for applications where single service is required in open space areas. The 880CS1 floor box is offered in a durable cast iron construction, designed to be installed in on-grade concrete floor applications and to meet a wide range of market requirements.

This floor box series has many applications, some of which are schools, financial institutions, and commercial office buildings.

- **TopGuard protection.** All cover assemblies for the Omnibox Floor Box Series have TopGuard protection. An integral design which keeps out water, dirt, and debris from the power and communication compartments.
- **Fully adjustable box.** Before and after concrete pour adjustability. Lower installed cost.
- **Watertight cast-iron construction.** Meets requirements for on grade or below grade application.
- **Boxes and covers have been listed by Underwriters Laboratories Inc.** to their standard UL514A, 514C, 514D, and Canadian standard C22.2
- **Flush activation assemblies for carpet and tile.** Aesthetically pleasing assemblies are interchangeable for both cast-iron and stamped steel.
- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point-of-use. A wide selection of data and bezel options available for use with Ortronics TracJack and Series II devices.
