

Pass and Seymour
Discontinued - 15A 125V SELFTTEST GFI REC IG TR **
Part No. 1597IGTR

Conducts an automatic test every three seconds, ensuring it's always ready to protect. If the device fails the test, the indicator light flashes to signal that the GFCI should be replaced. It also has our proven SafeLock&trade- Protection feature: if critical components are damaged and protection is lost, power to the receptacle is disconnected.For detailed Tamper-Resistant receptacle information, visit our Tamper-Resistant Receptacles page.

Features & Benefits

Hospital Grade Tamper Resistant GFCI
