

Legrand keyed LC fiber solutions provide a simple and convenient way to physically prevent the user from making an unauthorized connection by blocking access to specific optical ports, whether they are at a workstation outlet or in a telecommunications room or data center. This is particularly important for government, finance, military and other facilities where multiple networks having different security level access requirements may be co-located.

## Features & Benefits

|   |  |
|---|--|
| 12 color/key configurations available   | 50/125 $\mu\text{m}$ and 9/125 $\mu\text{m}$ laser-optimized fiber types available |
| LC Keyed cadapters prevent improper connection of separate networks with common access points | 50/125 $\mu\text{m}$ and 9/125 $\mu\text{m}$ laser-optimized fiber types available |
| Each LC secure adapter will mate only with same-color LC secure connector                     | High quality 1.25 mm zirconia ferrules used  |
| Internal keying feature prevents tampering  | High quality 1.25 mm zirconia ferrules used  |
| 1.6 in boot protects the splice for easy cable management                                     | The solution to managing multiple networks with reduced risks                      |
