

Wattstopper
Discontinued - M2M Platform, Indoor, 6LoW PAN, WiFi, CDMA 1000 Pt.
Part No. 225CWS

The Wireless Network Manager and Supervisor are scalable hardware and software designed to manage exterior lighting control networks. A network consists of at least one wireless control node, such as the NWTL-111, and a Network Manager. Networks can be expanded by adding nodes, and, if needed, more managers. Network Supervisor software can coordinate control of multiple managers, and provide long term data storage. Supervisor licenses run on Windows or Unix servers.

Features & Benefits

Scalable IP-based monitoring and control platform for wireless nodes

Manages exterior lighting control site wide, or across multiple sites

Cellular connection option preserves corporate firewall

Graphic-rich browser-based user interface accessible from PC or mobile devices

Wired and wireless connection options

Based on open standards for easy integration with building systems

Not for sale, resale, importation, installation or use in California

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182938599
--------------	-------------	------------	--------------

Country Of Origin	China
-------------------	-------

Dimensions

Product Width US	8.0 in	Product Weight US	1.25 lb
------------------	--------	-------------------	---------

Product Volume US	77.52 cu in	Product Depth US	4.8 in
-------------------	-------------	------------------	--------

Product Height US	1.9 in
