

Wattstopper

Discontinued - M2M Platform, Indoor, 6LoW PAN, WiFi, CDMA 1000 Pt.

Part No. 225CWS

The Wireless Network Manager and Supervisor are scalable hardware and software designed to manage exterior lighting control networks. A network consists of at least one wireless control node, such as the NWTL-111, and a Network Manager. Networks can be expanded by adding nodes, and, if needed, more managers. Network Supervisor software can coordinate control of multiple managers, and provide long term data storage. Supervisor licenses run on Windows or Unix servers.

Features & Benefits

Scalable IP-based monitoring and control platform for wireless nodes

Cellular connection option preserves corporate firewall

Wired and wireless connection options

Not for sale, resale, importation, installation or use in California

1.9 in

Manages exterior lighting control site wide, or across multiple sites

Graphic-rich browser-based user interface accessible from PC or mobile devices

Based on open standards for easy integration with building systems

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182938599	
Country Of Origin	China			
Dimensions				
Product Width US	8.0 in	Product Weight US	1.25 lb	
Product Volume US	77.52 cu in	Product Depth US	4.8 in	

Product Height US
