Fib-or-Cop II provides greater multimedia capacity, addressing the increasing need for fiber in horizontal cabling systems. This larger version of the Fib-or-Cop has the ability to mount six TracJack® or three Series II® modules in the face, with a choice of fiber (LC, SC, ST or MT-RJ) and/or copper (TracJack) exiting from the bottom. This design allows the cover to be removed without disrupting the connections in the faceplate. The wide variety of connectors located in the bottom positions can be further protected by an optional snap-on shroud. In addition, the Legrand® line of workstation solutions offers many alternative designs to accommodate multimedia needs for in-wall and surface mount installations. Quick and reliable data center installations are a SNAP™ with this innovation from Legrand®. In today's workplace, where network downtime is costly and detrimental to any business or organization, bringing a new data center online must be completed as quickly as possible. Quick and easy installations that guarantee reliable performance are more critical than ever. Clarity® SNAP Pre-Terminated Copper Cabling System offers the above-the-standards performance of Clarity connectivity in a custom terminated cable assembly system that's ready to plug and go. Its innovative modular design combines high performance and installer friendly features with the quick deployment and reliability of a factory terminated and tested cabling system.

Features & Benefits

High capacity multimedia design	Fully segregated design
Innovative internal fiber and copper cable management	Multiple label fields

Specifications

General Info

Product Line	Ortronics	UPC Number	662875410423
Country Of Origin	Taiwan, Province Of China	Application Sector	Commercial
Standard	UL Standard	Type	Workstation

Additional Information

Product Environmental Profile	Yes

Technical Information

| Number of Ports | 6 | Number of Gangs | 1 |
