

Wiremold
800CILCK Series Cast-Iron Floor Box
Part No. 800CILCK

This semi-adjustable cast iron floor box provides an excellent and economical activation solution for the low density power or communication requirements for on-grade open space areas. These boxes feature an aesthetic, low profile brass appearance that allows you to activate your wiring without obstructions. Activations for these boxes can be flush or pedestal type. These boxes also accept the 525 Series Service Fittings, allowing for more configuration options and a die-cast aluminum look. Typical applications would be in any large open space area.

Features & Benefits

Stamped steel construction. Meets requirements for above grade applications. Lower cost alternative to cast iron boxes on above grade applications.

Activation flush or pedestal. Flexibility to meet power or data wiring requirements. Variety of aesthetically pleasing cover options.

Single power receptacles available. An inexpensive option for low density power requirements for open space areas.

Covers are interchangeable for cast iron and stamped steel. More activations to meet any decor.

Specifications
