

The Cablofil Center Drop Out (CDO) is designed especially for high capacity data centers, where a cable drop is often needed after cables are already in place. With a simple snap-on application, the CDO can be installed on your schedule, before or after the cables are set up, and remains tough enough to maintain support and bend radius of the heavy weight of copper and fiber optic cable bundles.

Features & Benefits

Pre- or Post-Installation Options	Add the CDO to your wire mesh tray when you choose, either before or after cabling is installed
Variety of Finishes	The CDO comes in electrozinc, white, black or custom colors to match your data center
Easy to Install	The CDO snaps right on the wire mesh tray for a quick and simple installation
2 Vertical Raceway Options	Connect 4" wide vertical wire mesh easily
Mates with 4" wide Ortronics endcap and inner duct	Side Rails
Provides a smooth surface for horizontal cable direction changes	Smooth Transition for Cables
Provides support for full 90: transition bend ensures cables do not have any potential pinch points or kinks	Tie Down Slots
Optional accessories are available to direct and secure the cables as they exit the CDO	Reusable
Easy to move as your needs change
