

Legrand's Emergency Shunt Relay can simultaneously bypass both a line voltage switch and a 0-10V dimming signal, ensuring that an emergency fixture illuminates at full brightness during a utility power interruption.

Features & Benefits

Bypasses line voltage and 0-10V dimming signal to ensure an emergency fixture illuminates at full brightness during a power interruption

Converts 20A of normal light fixtures to approved emergency lights

Universal mounting provides flush, fixture, plenum, or panel mounting

Small size ideal for junction box mounting in wireless lighting control systems

Test switch and LED allow for quick testing of proper function
