

Vantage
Design Center Software
Part No. Design-Center

Design Center is a single software tool for the specification, design, and programming of a Vantage lighting control system by a certified Vantage Dealer. This easy-to-use software allows for simple configuration and management of a Vantage system, which includes additional features such as the KolorTune library of preconfigured tunable load types, user interface management, and remote programming.

Features & Benefits

Full automation project management software suite

Integrate lighting, climate, and shades with premier partners seamlessly

Build consistent and intuitive user interfaces via Equinox, keypad programming and engraving

Access to quick quotes, bill of materials, project reports, and ordering during all project stages

Implement extensive UL/CUL/CE and energy code compliant lighting systems
