

The Fan Module offers an easy and quiet solution for 120VAC ceiling fan control. This fan module provides control of up to eight different multiple speed ceiling fans. The Fan Module can control four different speed settings plus the off setting (most other modules only control three). It allows you to control ceiling fan operation without adding any of the additional noise that would be encountered by using a dimming module for fan control. The module conveniently installs into a standard Vantage enclosure.

Features & Benefits

Self-powered module

Quiet fan operation, ensuring no additional noise

Integrates into LCAP lighting control panels

Surge protection for enhanced safety

Four ON speeds without the use of dimmers
